Office Action Summary

Art Unit: 1754

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 30-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 30-38, the adjective 'means' is improper because no function is described by the immediately preceding term.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 30-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 6667273

Although the conflicting claims are not identical, they are not patentably distinct from each other because the additional verbiage only recites how the composition works. Placing the material in a container is an obvious expedient to ship it or use it. The composition is an obvious variant of the combination with a sealed container since it must first be made before it can be placed in the sealed container. Thus, the two-way test is met.

Art Unit: 1754

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. Nakamura teaches in columns 2-4 and table 1 a composition containing iron powder or iron(II) salt, sodium bicarbonate (to release CO₂), CaCl₂ (solid electrolyte) ascorbic acid (acidification) and active carbon (water sorbent). The reference teaches broad ranges as to the amounts, and selecting from those disclosed is an obvious expedient; In re Boesch '205 USPQ 215. Since the components are the same, their effects and properties are the same too- In re Swinehart 169 USPQ 226. Note that this is essentially the same rejection made and affirmed in parent application 09/174977.
